IN THE CLAIMS:

Please cancel Claims 1-109. Please add the following new Claims.

110. (New) An interior rearview mirror system for a vehicle, said rearview mirror system comprising:

a rearview mirror assembly;

an information display repositionable between a viewing position and non-viewing position; and

said information display displaying one chosen from an output of a camera, vehicle status information, a compass display, a temperature display, a computer display, a train warning display, a clock display, and a television image.

111. (New) The interior rearview mirror system according to Claim 110, wherein said rearview mirror assembly comprises an electrically operated rearview mirror system and includes a wire harness, said information display being powered by said wire harness.

112. (New) The interior rearview mirror system according to Claim 111, wherein said rearview mirror assembly includes an electro-optic reflective element.

113. (New) The interior rearview mirror system of Claim 112, wherein said electro-optic reflective element comprises an electrochromic reflective element.

114. (New) The interior rearview mirror system of Claim 110, wherein said information display displays an output of a camera.

115. (New) The interior rearview mirror system according to Claim 114, wherein said information display displays an output of an internal surveillance camera.

116. (New) The interior rearview mirror system according to Claim 115, further comprising a camera, said camera being mounted at said rearview mirror assembly.

117. (New) The interior rearview mirror system according to Claim 110, wherein said information display is adapted to display multiple display functions.

118. (New) The interior rearview mirror system according to Claim 117, further comprising a housing, said housing including said display.

119. (New) The interior rearview mirror system according to Claim 118, wherein said housing includes at least one light emitting diode, said light emitting diode providing back lighting for said display.

120. (New) The interior rearview mirror system according to Claim 118, wherein said housing is supported from said mirror assembly by a support, said housing being pivotally mounted to said support to permit repositioning of said information display.

121. (New) The interior rearview mirror system according to Claim 120, wherein said housing further includes a circuit board, said circuit board supporting electronics for displaying information on said information display.

122. (New) The interior rearview mirror system according to Claim 121, wherein said housing is adapted for extension from and retraction into said casing.

123. (New) The interior rearview mirror system according to Claim 110, wherein said rearview mirror assembly includes a mirror casing, said casing including a recessed portion, said information display repositionable to said recessed portion when moved to said non-viewing position.

124. (New) The interior rearview mirror system according to Claim 123, wherein said rearview mirror assembly includes a reflective element, said recessed portion extending into said casing behind said reflective element.
